

## Find a Mercedes-Benz remanufactured engine with a discount of up to 70%

Dear Ladies and Gentlemen,

As part of our current campaign, we offer you a selection of efficient 4-cylinder engines up to powerful V8-engines from our Mercedes-Benz Classic range.

At Mercedes-Benz Classic, we focus on sustainability and efficiency. Our remanufactured engines are not just a cost-effective alternative. They also contribute to environmental protection. Parts that can be remanufactured find a new life in our engines. They are carefully inspected, professionally repaired and trimmed to the highest Mercedes-Benz quality standards before they are reinstalled. In addition, a high number of new parts have found their place inside our remanufactured engines.

The return of the old part, required in the regular reconditioned part purchase, is omitted from our sales campaign.

The engines can be ordered and picked up directly from a Mercedes-Benz sales partner. Prices include VAT and are only valid in Germany and are reserved for intermediate sales.
